Forecast for Thursday 13 May 2021

Weather: First thing a broad band of persistent, locally heavy rain is expected to move north and west through the region but turn lighter and showery from mid-morning. Dry for a time early afternoon however, showers are likely to develop, these becoming slow moving and locally heavy with a risk of thunder. Showers will tend to diminish during the evening with a few clear spells developing by midnight.

Chance of cloud free mountain/hill tops above 600m: Less than 10% becoming 50% by midday and then 70% by mid-afternoon.

Visibility: Poor to moderate during the early hours of the morning thou to mid-morning with persistent rain and low cloud at 300-400m. Visibilities improve by lunchtime, although patchy of cloud above 500m will give some temporarily poor visibilities over the summits. Sudden deteriorations in the visibility are possible in any showers during the afternoon.

Meteorologist's View

A wet and miserable start giving very poor conditions at summits, so wet weather gear is needed. The afternoon will feel pleasant in the sunshine however conditions in or near showers deteriorating quickly, combined with a small risk of thunder walking conditions may become challenging at times.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Tue 11 May 2021	1.8mm	10mm	40mm

Forecast for Friday 14 May 2021

Weather: It will continue to be unsettled and rather cloudy during the early hours of Friday leading to a rather dull start. However, cloud will tend to thin and break up a little from late morning with sunny spells developing with high UV levels. A few showers are likely during the afternoon before easing later. Overnight cloud will increasing from the west heralding the arrival of a band of rain for Saturday.

Maximum wind: Westerly 10mph

Chance of cloud free mountain/hill tops above 600m: 30% increasing to 70% from mid-morning.

Visibility: Generally good, however low cloud, particularly across eastern slops early morning will give poor visibilities above 400m. Conditions will improve from mid-morning as cloud breaks up. Sudden deteriorations in the visibility are possible in any showers during the afternoon making the view of nearby hills appear rather hazy.

Temperature: **Valleys:** Plus 7 Celsius becoming plus 10 Celsius.
At 600m: Plus 4 Celsius becoming plus 7 Celsius.
Freezing level: Above summits.
